Professional Summary

Entry-level Java Full Stack Developer with a strong foundation in Core Java, SQL, Spring Boot, and RESTful Web Services. Proficient in developing backend systems and responsive web applications using HTML, CSS, and JavaScript through academic projects and hands-on training. Familiar with object-oriented programming, database management, and software development best practices. Passionate about writing clean, maintainable code and eager to contribute to real-world software development as part of a collaborative team.

Education

Bachelor of Engineering in Computer Science 2025
Poojya Doddappa Appa College of Engineering — VTU

Technical Skills

Programming Languages	Java, SQL, PL/SQL
Web Technologies	HTML, CSS, JavaScript
Frameworks & APIs	JDBC, Hibernate, Spring Boot, Basics REST APIs
Databases	SQL, MySQL.
Developer Tools	VS Code, Eclipse, Git, MS Word, MS Excel, MS PowerPoint
Software Engineering	SDLC, Development, Debugging, Troubleshooting
Core Concepts	Object-Oriented Programming, Data Structures and Algorithms
Soft Skills	Problem Solving, Analytical Thinking, Communication, Time Management, Team Player, Adaptability, Positive Attitude, Willingness to Learn

Internship

Trainee – Java Full Stack Developer Jun 2025 – Jan 2026
J Spiders, Bengaluru, India

- Developed web applications using Java, SQL, Spring Boot, REST APIs, HTML, CSS, and JavaScript.
- Designed and implemented RESTful APIs and performed CRUD operations using SQL and JPA.
- Wrote optimized SQL queries involving joins and indexing to improve database performance.
- Used Git and GitHub for version control, code collaboration, and maintaining project repositories.
- Participated in team discussions, code reviews, and followed Agile development practices.

Projects

AI-Driven Health Appointment & Prescription Management System

- Designed and developed a Spring Boot-based backend system to manage patient registration, doctor scheduling, and prescription records.
- Followed layered architecture with REST controllers, service layer business logic, and repository layer for database interaction.
- Implemented secure REST APIs and performed CRUD operations using MySQL and JPA.
- Tested APIs using Postman and verified proper status codes and JSON responses.
- Planning to integrate an AI-powered chatbot for instant patient support and prescription assistance using Generative AI.

Age and Gender Detection Using Python

- Developed a real-time age and gender detection system using Python, OpenCV, and pre-trained CNN models.
- Implemented face detection and image preprocessing before prediction.
- Improved processing speed by resizing frames and reducing redundant computations.
- Achieved high prediction accuracy on live webcam input through model optimization.

Certifications

- Java – HackerRank
- SQL – HackerRank
- Introduction to IoT – NPTEL
- Software Engineering – JPMorgan Chase – Forage
